PAY TO OWN. NOT PAY FOREVER.

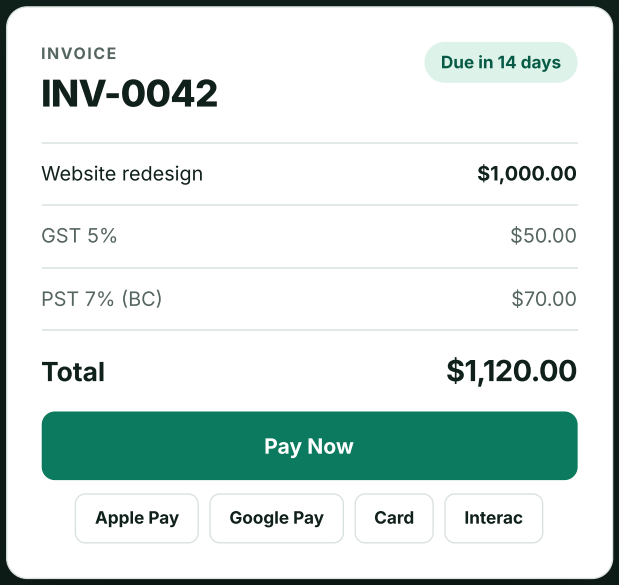

The invoicing plugin for WordPress, built for Canada.

Upload it like any WordPress plugin, and invoicing, payments, booking and more appear inside your own dashboard. Pay $1,500 once, or $50 a month until you own it, with no per-seat charges.

Ask for Live Demonstration

See what is included ↓

- ✓ Installs as a WordPress plugin
- ✓ $1,500 once, or $50/mo to own
- ✓ No Forever Subscriptions
- ✓ Pay Once, your choice!
- ✓ No seats
- ✓ No nag screens

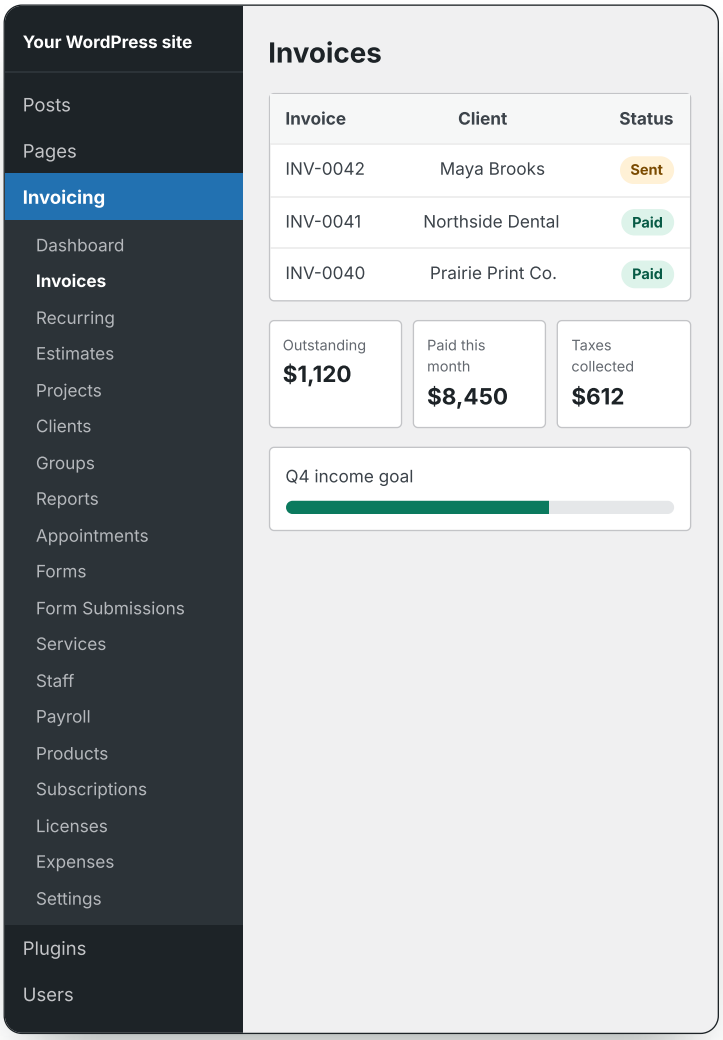

EVERYTHING INCLUDED

One WordPress plugin. Your whole back office.

Invoice Manager for Canada installs on your existing WordPress website like any other plugin. No new software to learn, no separate login, no monthly platform. An Invoicing menu appears in your dashboard and everything below is already in it.

1. Upload the plugin
2. Activate it
3. Start invoicing

Invoices and estimates

Branded PDFs, online accept, one-click convert

Recurring billing

Schedules that send themselves

Deposits

Percent or fixed, on every gateway

Online payments

Card, Apple Pay, Google Pay, Interac

Canadian taxes

GST, HST, PST and QST by province

Online booking

Services, staff and calendar sync

Appointments calendar

Drag and drop, 8 designs, role access

Client portal

Self-serve invoices and profiles

Projects

Progress bars clients can follow

Forms

Five designs, filed by client

Shop and subscriptions

Sell products and licenses

Expenses and payroll

Receipts, T4 / T4A tracking

Reports

Taxes collected, income, expenses

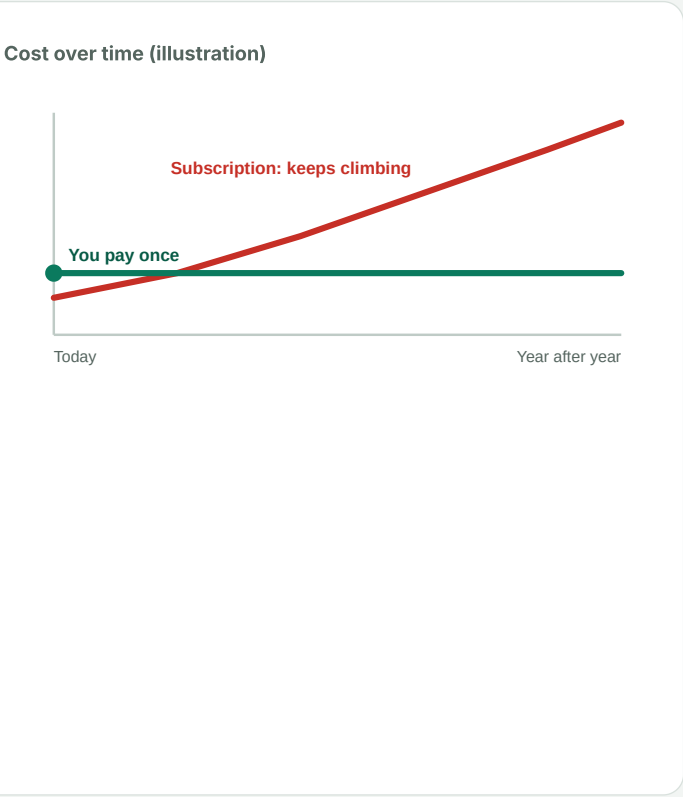

Email and reminders

Branded, logged, automatic

All of it is included in the one price. No tiers, no add-ons to unlock, and your data stays in your own WordPress database.

WHY BUY INSTEAD OF RENT

Most invoicing tools charge you every month, forever. This one doesn't.

One license per site. Two ways to pay.
Pay $1,500 once, or $50 a month for 36 months ($1,800 in total). Then it is yours for life, with no renewal date to remember. Each website you run it on has its own license. See pricing

No seats.
A seat is a paid license for each person who uses software. We don't charge for them, so your team and client list can grow without your bill growing with it. What is a seat?

Nothing paywalled.
Every feature on this page is included. No "Pro tier" to unlock the good parts.

Your data stays on your site.
It lives inside your own WordPress. Payments go straight to your own gateway accounts.

A CLOSER LOOK

See the main features in action.

CANADIAN TAXES, HANDLED

GST, HST, PST and QST applied automatically.

Pick the client's province and the right taxes are added to every invoice and estimate. All 13 provinces and territories come pre-filled, and every rate is editable when governments change them. Tax-exempt clients are one checkbox.

Try it: choose a province.

Ontario | British Columbia | Quebec | Alberta

Consulting, subtotal	**$1,000.00**
HST 13%	$130.00
Client pays	**$1,130.00**

Sample amounts for illustration. Rates are editable in Settings.

GET PAID YOUR WAY

Cards, wallets and e-Transfer. No middleman fees from us.

How your client pays

Stripe cards | PayPal | Square | Helcim | Moneris | Interac e-Transfer

One-tap wallets

Connect the processors you already use. Every invoice gets a secure, login-free "View & Pay" page. Apple Pay and Google Pay run through your own Stripe account, so there is nothing extra to subscribe to. Money goes to you, not through us.

Pay with Apple Pay | Pay with Google Pay

✓ **Payment received.** The invoice flips to Paid and a receipt goes out automatically.

DEPOSITS ON INVOICES

Ask for a deposit up front. Collect the rest after.

Add a deposit to any invoice or recurring invoice, as a percentage of the total or a fixed dollar amount. The View & Pay page asks for the deposit first, and once it is paid it asks for the balance. The PDF shows what is due now, and every payment gateway charges the right amount automatically.

- **Recurring invoices** can copy the deposit onto every invoice, or take it on the **first invoice only**.
- **Generate and email now.** Tick one box when you create a recurring invoice and the first one goes out immediately.

Try it: pick a deposit.

25% | 50% | $300 fixed

Invoice INV-0042 — Deposit requested

Invoice total	**$1,120.00**
Deposit (25%)	$280.00
Balance after the deposit	$840.00

PAY DEPOSIT

A deposit of **$280.00** is due now. The remaining **$840.00** will be due after that.

Pay $280.00 now

Sample amounts for illustration.

YOUR BRAND IN EVERY EMAIL

Every notification, rewritten in your voice.

Edit the subject and message of all 13 automatic emails, with HTML if you want it. Choose from four layouts, set your accent colour, add your logo and a signature, and pick a button style. Every invoice email also ends with a plain link, so clients can always get to their invoice.

Try a button style:

Solid | Rounded | Pill | Square | Outline | Soft tint

Your Company

ONLINE BOOKING

Book a service

CONSULTATIONS

Clients book, pay and reschedule themselves.

Set your hours, group services under colour-coded headings, and take a deposit or full payment up front. Unpaid bookings warn the client, then release the time slot automatically, and the warning email lets them pay or move the booking. Add staff, Google Calendar sync, and a "My Bookings" page for your clients. Show each service group in its own layout, and let clients stack the services you allow in one visit, all without the page jumping back to the top.

HOW BOOKING WORKS

Set up your services once. Deposits keep your calendar full of real appointments.

1. Add your services in minutes

Create each service

Give it a name, a price, a length, and a deposit percentage (or require payment in full). Set the length to 0 for drop-off work that needs a date but no time slot. Add a turnaround time in days, weeks or months. Or sell it as a subscription that renews weekly, every 2 weeks, monthly or annually.

Group with colour

Sort services under coloured headings so clients can find what they need at a glance. Each category gets its own booking shortcode automatically.

Set your hours and publish

Choose your business hours and how long clients have to pay, then drop the booking page onto any page of your site.

2. Then it runs itself

A client books online and is asked for the deposit. What happens next depends on whether they pay.

STEP 1

Client books online and receives a deposit invoice

Their time slot is held for them while they pay.

THEY PAY THE DEPOSIT

Appointment confirmed

- The booking is confirmed and **added to your calendar** (with Google Calendar connected).
- Invoice marked paid and a receipt goes out automatically.
- The client sees it under "My Upcoming Bookings", and can follow the work's progress if you turned on tracking.

THEY DON'T PAY

A reminder first, a clean cancellation last

REMINDER EMAIL

Before the deadline the client is warned and offered two buttons:

Pay Now | Change My Booking

↓ still unpaid when the deadline passes ↓

AUTOMATIC CANCELLATION

- Appointment cancelled
- Removed from your calendar
- Unpaid invoice removed
- Time slot opens up for someone else

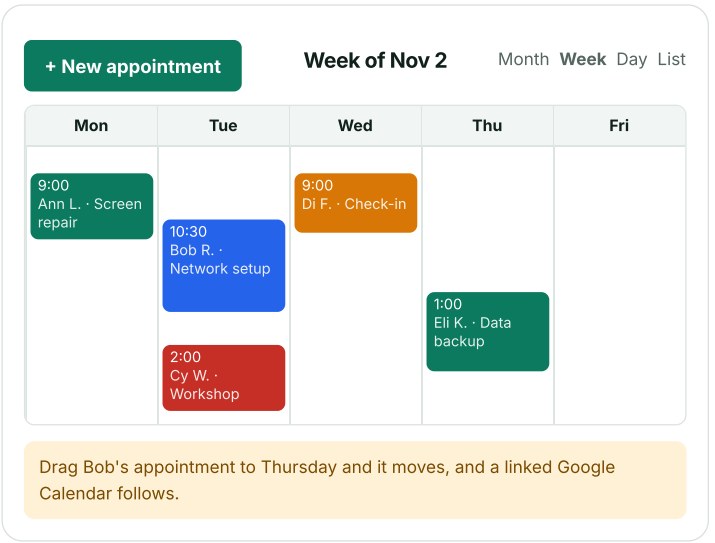

You choose how many hours before the appointment the deposit is due, and whether reminders are sent.

APPOINTMENTS CALENDAR

See every appointment, and move it with your mouse.

All of your bookings in a full calendar, in your WordPress admin or on any page of your site. Drag an appointment to another day or time, click it to see the details, update progress, open the invoice, cancel it, or add a new one by hand.

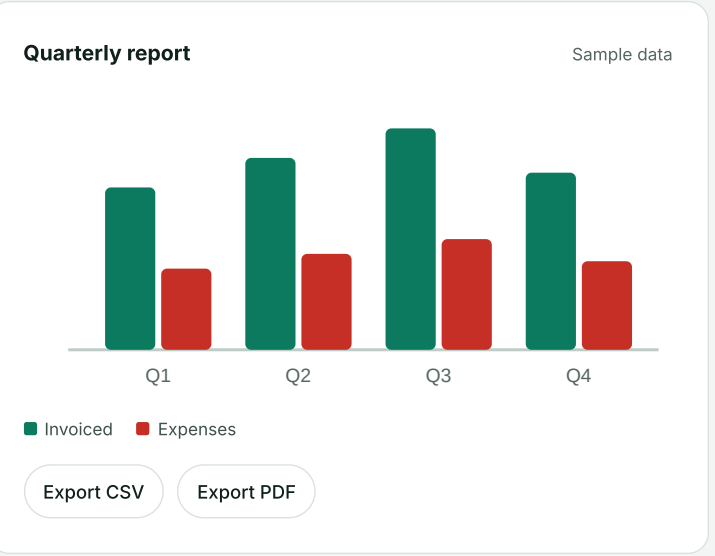

- Month, week, day and list views, coloured by service group
- Add an appointment yourself, with or without an invoice. If Google Calendar is linked it is added there too, and it shows up in your Apple Calendar feed
- Optional email to the client when you move or cancel
- Choose from 8 designs: Classic, Midnight, Ocean, Forest, Sunset, Mono, Blush and High contrast
- Shortcode for your own team: you pick which roles can see and manage it, and every action is checked on the server
- Your size, or full screen

REPORTS AND TAX TIME

Quarterly numbers ready when the accountant asks.

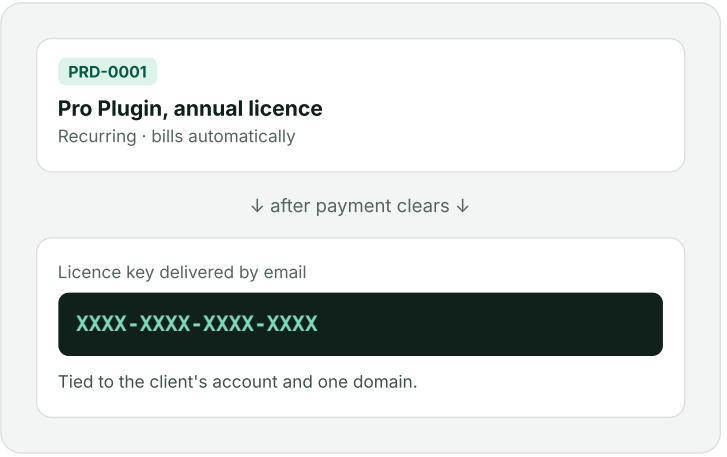

See invoiced, tax collected, payments received, expenses and net income by quarter. Invoice, estimate, payment, client, expense and payroll reports all export to CSV or PDF. Mark practice invoices as test payments and they stay out of every total.

SELL YOUR OWN PRODUCTS

A built-in shop for downloads, licence keys and subscriptions.

Sell files or licence keys from any page. Delivery only happens once the invoice is paid. Offer recurring products that bill on schedule, auto-stop after a cap or end date, and manage licences per client. Every product gets its own permanent product code, and a client's websites are added to their profile only after they have paid.

FORMS AND INTAKE

Build a form once. Email it to anyone, or drop it on any page.

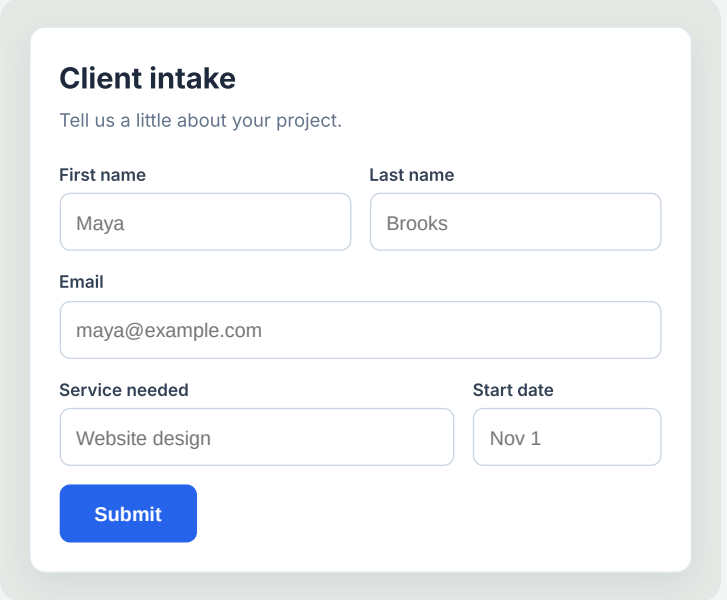

Intake forms, questionnaires, onboarding checklists. Answers are filed under the right client automatically, and clients you have not added yet are created from their email address.

Pick a look. It applies to every form.

Five ready-made designs, set once under Forms > Design, then shared by your emailed forms and the shortcode. Add your logo, choose an accent colour and corner roundness, and set the button text and position. Fields sit side by side in rows, or take the full width, and they stack on phones.

Clean | Midnight | Aurora | Minimal | Bold

- **Ten field types:** short and long text, email, phone, number, date, drop-down, radio buttons, checkboxes and a tick box.
- **Live preview** while you build, using your chosen design and logo.
- **Google reCAPTCHA** (v2 checkbox or invisible v3), switched on or off for each form.
- **Pop-up forms:** a button on the page opens the form in a pop-up, or open it from any link or menu item. Choose from twelve button designs, including rounded, and pick the button colour for each form. The window and backdrop match the form's design.
- **Placement and pictures:** align each form left, centre, right or full width, and add a Media Library image above, left or right of it.
- **Settings:** email notifications to you (and a copy to the client), redirect after submit, require login, one submission per client, and custom CSS.

Send it, or embed it

Email it to clients

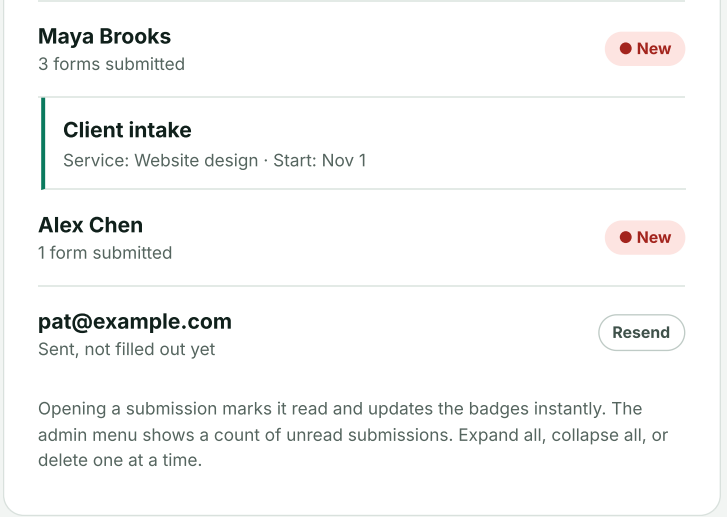

Pick one client, several, or a whole group. Each gets a personal link, so their answers land under their name.

Email it to people who are not clients yet

Paste any email addresses. Their answers create a client record from the email, or match one that already exists. A "Sent so far" list shows who has replied, and you can remove or resend.

Put it on a page

Use the form's shortcode on any page. Align it left, centre, right or full width, show it as a pop-up, and add a picture from your Media Library.

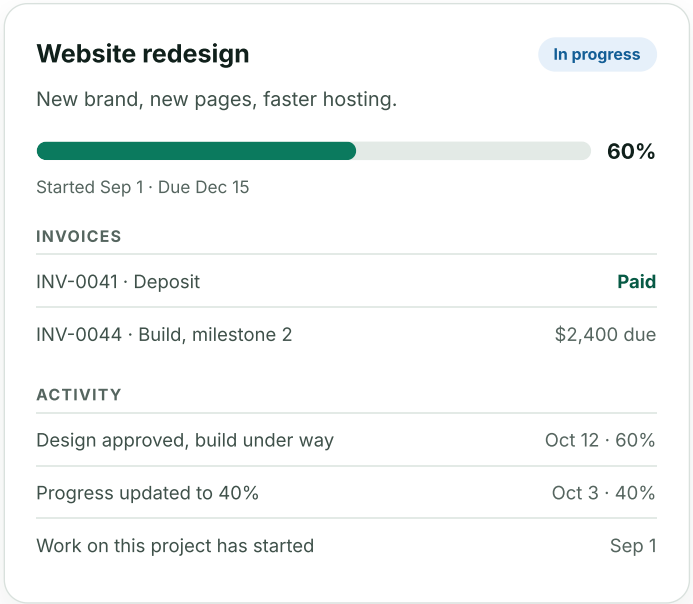

Opening a submission marks it read and updates the badges instantly. The admin menu shows a count of unread submissions. Expand all, collapse all, or delete one at a time.

PROJECTS

Show clients how the work is going. Skip the "any update?" emails.

Add a project for a client, link its invoices, and move a slider as the work progresses. A bar fills to the percent complete, and your client can follow along on their own page or get an email whenever you send an update.

- Status, dates and a percent-complete bar that fills as you go
- Link invoices to a project and see the total and the balance still owing
- Tick off finished tasks and send them to the client as a progress report
- Add more clients to a project, and email them only when you choose, or automatically
- A record of activity: started, progress, invoices, notes and every update emailed
- Clients are told when work starts, then get updates whenever you send them
- Clients follow it with `[imc_my_projects]`, which you can limit to the roles you choose

AND THERE'S MORE

Everything else that comes with it

Invoices and estimates

- Multiple line items and terms (Net 7 to 60 or custom)

Getting paid on time

- Reminders before and after the due date

Clients

- Self-serve dashboard with invoices, estimates and PDFs, with a Full

- Branded PDFs, built in
- Clients accept or decline estimates online
- One-click estimate to invoice
- Six look-and-feel templates
- Saved, scheduled promotions that apply to invoices automatically
- Clear PROMO APPLIED marking on the invoice, PDF, reports and client dashboard

- Automatic late fees, percent or flat
- See when a client opened an invoice
- Recurring invoices that send themselves, with an optional deposit and a "send the first one now" box
- Bulk status updates and bulk emailing
- See every notice sent for an invoice, and whether it went out manually or automatically

- screen button
- Read-only profile page with their websites
- Clients update their own contact details with `[imc_edit_profile]`
- Eight ready-made client area designs
- New Invoice, New Estimate and New Client forms for your own pages: line items reshape to fit narrow columns, and each has a Full screen button
- Colour-coded groups, filters, CC addresses
- Linked to WordPress accounts automatically

Expenses and payroll

- Expenses with categories, vendors and receipts
- Track pay for staff and sub-contractors
- Payroll reports with T4 / T4A tracking
- Paid entries can post to expenses automatically

Booking extras

- Deposits or payment in full, per service
- Several services in one visit, with a stacking limit you set per group
- Payment-in-full services stack together and so do deposit services, but the two are never mixed on one invoice
- Thirteen service layouts, set per group, including a big + button that adds or removes a service
- Clients pick, check availability and book without the page reloading, with a red Cancel button that clears everything
- Quick Active / Inactive switch on every service
- Staff scheduling, optional client choice
- Google Calendar sync and a private Apple Calendar feed
- Block Canadian holidays and your own closed dates
- Appointments page with full history, reschedule and cancel
- Date-only services (length 0) that never block your calendar
- Turnaround times in days, weeks or months, with an estimated completion date
- Clients track status, progress and your notes under "Track your work"

Appointments calendar

- Every appointment in a month, week, day or list view
- Drag and drop to move it to another day or time
- Add appointments by hand, cancel them, delete cancelled ones
- Update progress and turnaround from the calendar
- Eight designs to choose from
- Put it on any page with a shortcode, for the roles you choose
- Set its width and height, or go full screen

Deposits and recurring billing

- Deposit by percentage or fixed amount

Forms

- Email to clients, groups or any address

Projects

- Status, dates and a bar that fills to percent complete

- Deposit first, then balance, on every gateway
- First-invoice-only deposits for recurring
- Generate and email a new recurring invoice immediately

- Five designs, your logo, side-by-side fields
- Submissions filed by client with new badges
- reCAPTCHA, pop-ups and per-form pictures
- Per-form text colour and logo plates for dark designs
- Custom CSS, notifications and redirects

- Link clients and invoices to each project
- Completed tasks, listed in the client's update email
- Extra clients can follow along, emailed only if you choose
- Activity record, with internal notes if you want them
- Start notice and update emails, with the progress and activity included
- Client page with `[imc_my_projects]`, limited by role if you like

Keep your books clean

- Flag test invoices, hidden by default
- Test payments excluded from every report
- Every email logged per invoice, marked manual or automatic
- Add your own payment gateway with a simple hook

WHAT YOU'D PAY ELSEWHERE

Three tools. Three bills. Three renewal dates.

A small service business usually pays for invoicing, online booking and forms separately, every month or year. Here is what a typical plan for each costs at list price, and what that adds up to over three years.

WHAT YOU NEED	A TYPICAL CHOICE	LIST PRICE	OVER 3 YEARS
Invoicing and online payments	FreshBooks Plus Up to 50 billable clients	**$42 CAD** / month	**$1,512 CAD**
Online booking	Acuity Scheduling Standard Up to 6 calendars, billed annually	**$27 USD** / month	**$972 USD**
Forms for your website	Gravity Forms Pro 3 sites, renews every year	**$159 USD** / year	**$477 USD**
Invoice Manager for Canada	Invoicing, booking, forms, a shop, payroll tracking and plugin licensing in one plugin Unlimited users. No renewals.	**$1,500** once or $50 a month for 36 months	**$1,500** and it is yours for life

THE THREE SEPARATE TOOLS

$1,512 CAD + $972 USD + $477 USD

Over three years, and the bills keep coming. Stop paying and you lose access.

INVOICE MANAGER, SINGLE SITE

$1,500 once

Covers all of the above and more, with no per-person charges. The shop, payroll tracking and plugin licensing are not even counted in the comparison.

List prices before tax, in the currency each vendor charges, taken from public pricing pages as reported by comparison sites between August and October 2026 (FreshBooks prices are regular, not introductory, rates). Plans differ in features and limits, and vendors change prices, so check each vendor for today's price. Product names belong to their owners and are used only to describe what a business might buy.

HOW PRICING WORKS

Pay once, or pay until you own it. Never pay forever.

One license covers one website. Choose how to pay: both options include every feature, and both end the same way, with you owning the system for life.

ONE LICENSE PER SITE

Single Site

One business, one WordPress site, plus a staging copy.

$1,500

pay once, yours for life from day one

OR

$50 / month

for 36 months ($1,800 in total), then it is yours for life

- Every feature, nothing paywalled
- Unlimited users on your site. No seats
- Updates and help with set-up
- Cancel the monthly option anytime
- Building sites for clients? Each client site gets its own license

Ask for Live Demonstration

OPTIONAL ADD-ON

Ongoing Support

Ongoing Razenet service and support for your system, month after month. Add it to your license whenever you want it.

Not included in the product purchase.

$19.99 / month

Billed monthly, in CAD

Typical subscription software

Pay every month, forever

Month 1 — Never ends

Razenet: pay to own

Pay monthly | Yours for life

Month 1 — Payments reach the total, then stop

Most invoicing systems charge you every month indefinitely. The day you stop paying, you lose access, and after all those years of payments you still do not own a thing.

Your payments build toward ownership. When they reach the cap, the payments stop and the system is yours to keep for life. Illustration only: the bars show the idea, not an exact scale.

PAYING IN FULL

Pay the one-time price ($1,500) and the system is yours for life immediately.

PAYING MONTHLY

Pay for 36 months. When your payments reach the total ($1,800) the system is yours for life.

CANCELLING

You can cancel anytime. If payments stop before the total is reached, the plugin is deactivated.

NO FOREVER BILLING

Unlike subscription software, the monthly option has a finish line. You pay until you own it, then you are done.

Want the details? Read the full **license terms** or the **frequently asked questions**.

WHAT IS A SEAT?

Most software charges per person. We don't.

A "seat" is a paid license for one person to use the software.

With per-seat pricing, every person who logs in needs their own seat, and you pay for each one, usually every month. If you have you, two staff members and a bookkeeper, that is four seats. Hire someone, pay more. Bring in your accountant for tax season, pay more. Your bill grows with your team, even though the software does exactly the same thing.

Per-seat software

Every person on your team is another seat to pay for.

You	AB	CD	BK	EF
1 seat	+1 seat	+1 seat	+1 seat	+1 seat

Five people, five seats. Add a person and the bill goes up.

Razenet Invoice Manager

No seats. Your price never depends on how many people use it.

You	AB	CD	BK	EF	+
included	included	included	included	included	no limit

One price, however big your team gets.

Hire without a surprise bill

Add a team member, a part-timer or a seasonal helper and your price stays exactly where it was.

Bring in your bookkeeper

Give your accountant or bookkeeper access at tax time without paying extra for them to look at the numbers.

Grow your client list

Add as many clients as you have. Nothing in the price changes as your business grows.

PAY TO OWN. NOT PAY FOREVER.

Buy it once. Run your business on it for good.

No Forever Subscriptions · Pay Once, your choice! · no seat limits
